PRECAUTIONARY DISINFECTANT PROTOCOL

Using professional, hospital-grade disinfectant products, SoCal Flood can help clean and disinfect your personal property or place of business that will help mitigate the risk of spreading the virus across your customer, workforce or even family. As per CDC guidelines, regularly cleaning and disinfecting of "high touch" surfaces and areas is one of the best practices in helping stop the spread of this contagion.

RECOMMENDED AREAS THAT SHOULD BE REGULARLY DISINFECTED INCLUDE:

- ☑ Bathrooms
- ☑ Bank counters
- ☑ Offices
- ☑ Kitchen
- ☑ Electronic equipment
- ☑ ATM machines
- ☑ Carpets and rugs
- ☑ and many more

PROFESSIONAL CLEANING AND DISINFECTING SERVICES

SoCal Flood is uniquely prepared during these troubled times to clean your home or place of business according to the guidelines and recommendations as set forth by the CDC Guidelines. Our trained professionals have years of experience dealing with biological contaminants and are certified IICRC Applied Microbial Remediation technicians. Our scope of work and services go beyond those of a regular janitorial services as our procedures includes cleaning of both, porous and non-porous surfaces as well as specialized tools and disinfectants not generally available to the public.
